

LAND A BIG EXPERIENCE

Peterson's Point Lake Lodge Arctic Photography Adventure

This is the land of unlimited photo possibilities. Whether you're shooting with an iPhone, compact camera or the latest DSLR you'll return home with spectacular images and a profound experience from being on the barrens.

Your Photo Adventure

Join us for a week-long adventure that will immerse you in the authentic splendour of the Northwest Territories. Witness the annual barren-ground caribou migration, enjoy the spectacular landscape in its autumn colour and see the aurora dance in the northern sky.

Your adventure begins in Yellowknife where you will enjoy two days of exploration and photo-shooting before flying over 200 miles north to Point Lake for a five night stay at Peterson's Point Lake Lodge. The lodge and guest cabins provide panoramic views of the barrens where animals and migratory birds can be seen from the picture windows.

In addition to photo-shooting caribou and the aurora your experience can be enhanced with the possibility of seeing grizzly bears, wolves,

wolverine, tundra swans, ptarmigan, peregrine falcons and more.

Each day you will explore the Arctic landscape with our team of professional guides in conjunction with photo lead, Dr. Robert Berdan. Robert is a renowned Professional Canadian Nature Photographer and Biologist, who has a passion for photography and teaching.

Throughout your stay Robert will be delivering a variety of photography and historical slide show presentations as well as providing hands-on instruction in the field. The sessions are relaxed. Whether you're looking to take your photography to the next level or prefer to photo-shoot without any coaching you can choose.

This week-long photography program is exclusive to small group size; 10 person maximum.
